

BIO DATA

NAME: G.M

AGE: 22

GENDER: Female

HR: 85 BP: 122/78 T: 39.2 SpO2: 99% BMI: 24.2

Chief Complaint: Sore throat, fever

History: Complaints of sore throat for the last one week. She's had such symptoms before, but came in because of how long it is lasting. Also complains of fever off and on. She's taken panadol and strepsils with some relief. She's been with a new boyfriend for the past one month, got her period two weeks ago. On exam, she appears fatigued. The throat is red, but no tonsillar exudates. She has swollen and tender anterior lymph nodes. Lungs are clear, abdomen is non-tender.
